

# Florent Lelong

## Florent Lelong

He's born on May 11th 1989 in Clermont (France)

Since the age of 10, **music is a part of his life** . Even if he first wanted to learn piano, he took drums lessons very early. Taught in an Ali Baba cavern full of toms, snares, cymbals, xylophones and more, he definitely consider music with a experimental approach.

He remembered his firsts musical emotions with **electronic music** , which is basically an experimental music. He's inspired by a lot of influences, taught by legends such as **Jarre, Vangelis, Air**, but also by a many different influences, from Pink Floyd to Chet Baker.

His very first album, **Electro Libre** , is an instant picture of this background, mirror of his musical emotions. Narrative and autobiographical, it's conceived as a musical journey through the times and musical genres, met by today's electro stream.

With **COLOR THERAPY** , his second album in date, out on February 1st 2010, sound research is the main idea, approaching music like painting, sculpture or cinema is the motivation. Sounds have shapes, colors..., music is not the sole purpose with this album.

*Meet people and listeners is his main motivation. Communicate with people, bring them electronic music richness and poetry, so frequently considered as a robotical and dehumanized.*
