BAND STORY

"

Hi,

My artistic name is electron7 and i'm an independent electronic music composer and producer from Belgium. As a very young fellow i already had strong interests in music.

I enjoyed classical, electronical and pop music very much and i already wanted to try to compose and create music myself.

So when i was 18 years old i got myself a synthesizer to try out.

I was impressed with Jean Michel Jarre's and Vangelis' delightful music which made significant influence on my future work.

Music is like a painting for me. Electronic music for me is not something that is death or is linked with space , but i see it more as something organic and earthly, directed to the creation.

As you paint colors, or with nutrients that you bring along to make a dish, as i see it also in making electronic music.

Music are not only musical notes, but also sounds!

Any sound can become music, if you put it in the right combination with other sounds.

Between 1994 and 2006, i extended my music studio more and more and i worked hard on different demo projects named "The creation", "Water", "Obelisk", "Ichthus", "Revelation". It was a quest for a style of music that i wanted to make.

FEATURED SONGS

-  **It's time** Electronic
-  **Eden (part1&part2)** Electronic

In 2007 i have decided to compose and to release a full length album "Transfomation" on the internet and make it available to the public. The album was released in 2008 under Creative Common License on a music network like Jamendo. In 2009 i released a special project album "The secret place" that is very special to me.

My music is first and foremost to praise and worship God. My music is instrumental for 99% and is about personal situations, testimonies, God's power and feelings, biblical themes, etc.

If you want to read more on my music, my studio and my background then please visit my main website on:
